

## **DuraGal** **Plus**®

**Given the diverse climate and geography of the Australian landscape, only a DuraGalPlus coating can give you the peace of mind that you have the protection you need for the job at hand.**

DuraGalPlus can be used in a variety of residential construction applications such as roof trusses, fencing, verandahs, elevated flooring solutions and shade structures. It is also commonly applied across a variety of other sectors including mining, commercial, engineering, manufacturing, agriculture and transport.

All Austube Mills products are third-party certified (ACRS) to meet the highest AUS/NZ Standards, ensuring you receive the safest and highest quality structural steel pipe and tube every time.

DuraGalPlus steel products have a smooth, even galvanized surface finish which produces significantly less weld spatter and fumes compared to traditional hot-dip galvanized coatings, making it safer and easier to weld. DuraGalPlus is manufactured to a minimum average coating mass of 100g/m<sup>2</sup> on the internal and external surface, resulting in superior corrosion protection. It is manufactured to the following AUS/NZ Standards:

- > AS/NZS 1163:2016 – Cold-formed Structural Steel Hollow Sections.
- > AS/NZS 4792:2006 – Hot-dip galvanized (zinc) coatings on ferrous hollow sections, applied by a continuous or specialised process.

DuraGalPlus products are part of the DuraGal® range of coatings and are available via the Austube Mills' network of more than 200 distribution partners across Australia and New Zealand.
